

» case story

We asked a Bank in Austria

Why did you choose the SC 8200?

Our primary concern is naturally the cost, especially in the current financial crisis, and SC 8200 is offered at a very competitive price compared to similar products. We also performed a test with several products and we were amazed how silent and smooth SC 8200 was to work with.

The look and feel of the product, meaning the small foot print and that it is easy to operate, made SC 8200 stand out from the crowd.

Which business benefits or effects have you seen?

SC 8200 offers several functions which will simplify our work and it also fully complies with the ECB Recycling Framework.

Another possibility which we are currently looking into is to refill our ATMs ourselves. In Austria it is usually CIT (Cash in Transit) companies that fill the ATMs but with the competitive price of the product we will compare it with CIT delivery costs.

“We were amazed how silent and smooth it was to work with”
