Cash**Complete**™

CashComplete POS Coin and CashComplete POS Note

For a closed and secure retail cash loop

YOUR WORLD COUNTS

CashComplete POS Note and Coin is SCAN COIN's fully automated cash handling solution for retail to minimize manual handling in the check-out lanes. It is a closed end-to-end solution, securing the entire cash loop, from the checkout to the retailer's account, resulting in increased security, reduced costs and more flexibility. It significantly reduces the risk of robberies and theft as the cashier does not have access to the cash contributing to a safe working environment.

- ► Intelligent cash flow control

- ► Optimising the complete cash flow

- ► Full connectivity to the unique monitoring platform

- ► Optimising the complete cash flow

SCAN COIN

a **SUZOHAPP** company

For a closed and secure retail cash loop

Let your customers pay quickly and easily with both coins and notes at the checkout. By using this secure and closed point of sale system retailers will minimise the incidence of counterfeits, counting errors and shrinkage. Recycling of coins and notes also makes sure you never run out of change.

Accurate counting providing customer confidence

World-leading sensor technology counts the coins and notes into the system, minimising the risk of counting errors and shrinkage. Recognizing and rejecting counterfeit coins and notes is a vital function in a system that automatically recycles cash from one customer to the next. A store that accepts and passes on counterfeit cash, no matter how unwittingly, faces not only economic loss but also, and perhaps more damagingly, a sharp decline in customer confidence. With its fine balance between capacity and size, CashComplete® POS is designed to fit existing counters, but has been sensitively designed for both current and future checkout styles. Every note and coin can be recycled and cashback becomes an option. CashComplete® POS allows smooth integration with existing EPOS applications.

Paying with coins

Coins can be paid a handful at a time, which speeds up the transaction. It also encourages consumers to pay with coins, helping retailers to avoid change shortfalls. Typically, the recommendation is to face the coin unit towards the consumer and coins can be inserted while the goods are being scanned.

Paying with notes

Notes are inserted in a single slot, leading to a compact unit for easy integration in the checkout furniture. It also means that the notes do not have to be sorted manually. Many retailers choose to let the cashier accept and pay the notes into the system. However, with the high level of counterfeit detection, it is possible to also integrate the note unit as a customer-operated solution.

Monitored with CashComplete POS Supervisor SW

The supervisor software enables you to monitor the content and status of each CashComplete POS by defining the minimum and maximum content of each "till". CashComplete Supervisor SW also stores all transactions from the tills and can generate reports such as End Of Day reports and transaction reports.

Superior financial and operational control

CashComplete POS works seamlessly with the unique monitoring software solution. It is the ultimate management platform for superior financial and operational control of cash. CashComplete is also connectable to any existing network and can be monitored from any remote position. Benefit from best-in-class cash handling technology and system.

▶ ERP integration
▶ CIT integration
▶ Report generation

▶ Financial control
▶ Monitoring for maximum uptime
▶ Automated reconciliations

Specification

Dimensions

Coin unit:

Width	276.5 mm / 10.89"
Depth	296.0 mm / 11.65"
Height	998.0 mm/ 39.29"
Weight	37.0 kg / 81.57 lbs

Note Unit:

Width	222.2 mm / 8.75"
Depth	380.0 mm / 14.96"
Height	842.0 mm / 33.15"
Weight	63.0 kg / 138.89 lbs

PC/Power unit:

Width	580.0 mm / 22.83"
Depth	224.0 mm / 8.82"
Height	65.7 mm / 2.59"
Weight	6.0 kg / 13.23 lbs
Voltage	200-240 V / 50 Hz
