

# Coin Deposit Sidecar

Self-service automation of coin deposits  
customized for third-party cash machines

Add the best coin management technology to your  
existing self-service cash handling portfolio

## Coin counting technology you can trust

SUZOHAPP/SCAN COIN offers best-in-class technology for coin management based on over 50 years of innovation and a leading position in the cash handling market. Our bulk coin deposit sidecars offer secure and reliable solutions for coin deposits as an add-on function to an existing self-service cash machine, ATM, kiosk or terminal.

### Seamless integration

The sidecars are designed to be seamlessly integrated to your existing self-service machine. Each sidecar can be customized following the design of the main module, using similar materials and surface treatments. See example to the right where a sidecar is part of the SCAN COIN Cash Deposit Solution, CDS-9.

### Maximum uptime and reliability

The ergonomics and technology have been carefully developed, tested, and verified to create easy-to-use, hassle-free operations with maximum uptime and exceptional reliability. The sidecar is built upon the strongest coin counting module on the market with a counting speed of up to 800 coins a minute and the ability to validate up to 32 separate denominations. Over 30,000 installed units worldwide, you can trust that the sidecar has you covered.

## A world of benefits

### Maximum uptime

- Automatic removal of foreign objects
- State-of-the-art equipment
- Easy access to the complete coin path for jam clearance and preventive maintenance

### Thoughtfully designed

- Well-proven and ergonomic coin management
- Custom design to fit any existing self-service machine
- Lifiable coins trays, shutters, reject trays and guiding lights

### Best-in-class bulk coin deposit

- Coin recognition and suspect coin detection
- Reject of non-identified coins/tokens
- Optional Sort-by-Denomination feature
- Coin validation sensor approved by ETSC
- Multi-currency availability

The sidecar is successfully tested by ECB in accordance with Article 6 (1) of Regulation (EC) No 1338/2001
