SC-8220

1+1 Pocket Value & Multi Currency Sorter

Make Cash Handling Easy and Secure

Latest Note Technology

SCAN COIN

Reduce the manual cash handling and get full control of your cash. Introducing the SC-8220, a high quality value and multi-currency counter that delivers outstanding results at low cost.

Full Flexibility for the Distributor with Little Effort

The SC-8220 comes with a preset of around 20 currencies. One set of currencies will be available for each main geographic region containing main international currencies and regional currencies. The distributor has the flexibility to reduce the number of available currencies to each client depending on the local sales organization. Update of notes will be available by a simple SD Card insertion.

Full Flexibility for the End User in an Enriched User Interface

It counts and verifies one currency with ease and accuracy, but when it comes to handling multi-currency the new SC-8220 also proposes two new modes to avoid time consuming and repetitive manipulations:

Multi - The machine accepts different currencies in one single operation and provides a total note count split into the various currencies found within the note bundle

Auto - The machine identifies the currency of the first note in the bundle and sets itself in the mode to count this currency and to reject all other currencies. As soon as the pockets are empty, the machine turns back to the auto mode for the next notes acceptance. In this mode mixed notes of many different currencies are counted without any keyboard operation.

The user can also reduce the number of currencies available through the currency button in order to have only the most current one set by one finger click, while quickly accessing the full list to activate unusual ones.

UV LED Bar

A new patented UV LED bar placed under the machine will help manual authentication of bad notes. The UV lights will turn on automatically for a few seconds when the notes are rejected.

Integration and Backward Compatibility

For easy back office integration SC-8220 is provided with its own protocol. All transactions can be seen and managed using the free software.

Front Access Features

The SD card slot is placed on the front of the machine, thus making the update of the machine very simple. If an SD card is kept in the machine, the SD card will contain the list of all notes counted or rejected, including serial numbers of the notes read.

Technical Specification

Dimensions (W x D x H)	275 mm x 260 mm x 319 mm (10.83"x10.24"x12.56")
Weight	Approx. 9.3kg (20.5 lb)
Hopper Capacity	Max 500 notes
Speed	800 notes per minute (serial number) 900 notes per minute (value counting) 1,100 notes per minute (free counting)
Interface	USB, SD Card, LAN, Serial port for printer and external display port

Applications

Thanks to its competitiveness and strong capacity, the SC-8220 is the perfect solution for smaller retailers to larger grocery stores, hotels, gambling halls, amusement parks, gas stations, chemist's shops, cinemas, banks and public transport companies.
